## Week 4 Quiz

1 point				
1.				
What are the current limitations of AI technology? (Select all that apply)				
Al technology is susceptible to adversarial attacks				
Al technology can be biased				
There are no limitations to Al technology				
Explainability is hard				
Al technology can discriminate				
point				
2. What is the Goldilocks Rule of Al?				
One shouldn't be too optimistic or too pessimistic about AI technology				
Al's technology will continue to grow and can only benefit society				
One should allocate many resources to defend the world from giant killer robots				
An Al winter is coming				
1 point				
3.				
Say you are building an AI system to help make diagnoses from X-ray scans. Which of the following statements about explainability of AI do you agree with?				
Lack of explainability can hamner users' willingness to trust and adopt an Al system				

Most Al systems are highly explainable, meaning that it's easy for a doctor to figure out why an Al system gave a particular diagnosis.  Explainability is usually achieved through building a chatbot to talk to the user to explain its output.  1	ek 4 10 ques	Quiztems are intrinsically "black box" and cannot give any explanation for their outputs.
1 point 4.  Using current Al technology, if a machine learning system learns from text that reflects unhealthy biases/stereotypes, then the resulting Al software may also exhibit similarly unhealthy biases/stereotypes.  True False  1 point 5.  Using current Al technology, if a machine learning system learns only from text that is completely neutral does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6.  Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias		
point  4.  Using current AI technology, if a machine learning system learns from text that reflects unhealthy biases/stereotypes, then the resulting AI software may also exhibit similarly unhealthy biases/stereotypes.  True False  1 point  5.  Using current AI technology, if a machine learning system learns only from text that is completely neutral adoes not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point  6.  Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias		Explainability is usually achieved through building a chatbot to talk to the user to explain its outpu
point  4.  Using current AI technology, if a machine learning system learns from text that reflects unhealthy biases/stereotypes, then the resulting AI software may also exhibit similarly unhealthy biases/stereotypes.  True False  1 point  5.  Using current AI technology, if a machine learning system learns only from text that is completely neutral adoes not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point  6.  Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias		
Using current AI technology, if a machine learning system learns from text that reflects unhealthy biases/stereotypes.  True False  1 point  5. Using current AI technology, if a machine learning system learns only from text that is completely neutral adoes not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender bias.  True False  1 point  6. Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias		t
biases/stereotypes, then the resulting Al software may also exhibit similarly unhealthy biases/stereotypes.  True False  1 point  5. Using current Al technology, if a machine learning system learns only from text that is completely neutral adoes not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender bias.  True False  1 point  6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias	4.	
True  False  1 point  5. Using current Al technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True  False  1 point  6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias	_	<i>o.</i>
False  1 point 5. Using current AI technology, if a machine learning system learns only from text that is completely neutral adoes not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6. Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data Systematic auditing processes to check for bias	Diases	
1 point  5.  Using current AI technology, if a machine learning system learns only from text that is completely neutral address not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point  6.  Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		True
5. Using current Al technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		False
5. Using current Al technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
5. Using current Al technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
5. Using current Al technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biase.  True False  1 point 6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
Using current AI technology, if a machine learning system learns only from text that is completely neutral a does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender biased.  True  False  1 point  6. Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias	poin	<u>t</u>
does not reflect any gender biases, then we would expect it to exhibit no, or at most minimal, gender bias.  True False  1 point  6. Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
False  1 point  6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias	_	
False  1 point  6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		True
1 point  6.  Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		True
6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		False
6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
6. Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
6. Which of these are good practices for addressing bias in AI? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		ut.
Which of these are good practices for addressing bias in Al? (Select all that apply)  Using more inclusive/less biased data  Systematic auditing processes to check for bias		
Using more inclusive/less biased data  Systematic auditing processes to check for bias		of these are good practices for addressing bias in Al? (Select all that apply)
Systematic auditing processes to check for bias		
		Using more inclusive/less biased data
Technical solution such as "zeroing out" bias		Systematic auditing processes to check for bias
Technical Solution Such as Zeroling out bias		Tochnical solution such as "zoroing out" hips
		recrimical solution such as izeroling out iblas

Week 4 Quiz	
Quiz, 10 questions	
point	
7.	
Which of these are examples of adversarial attacks on an Al syst	em? (Select all that apply)
Subtly changing an image to make an Al system mistake	nly recognize a dog as a cat.
Using AI to synthesize a fake video of a politician saying	something they never actually said.
Subtly modifying an audio clip to make a speech recogn authorized" when they actually said "No, reject."	ition system think someone said "Yes,
Adding a sticker to a stop sign to make an Al system fail	to detect it.
8. If a developing economy has a strong and thriving coffee bean nindustry), then it has an advantage in applying AI to coffee bean  True  False	
1 point  9. What are the jobs that AI is most likely to displace over the next	several years?
	,
Jobs that comprise primarily of routine, repetitive work	
Jobs that comprise primarily of non-routine, non-repetit	ive work
Most jobs involving office work (white collar jobs)	
All jobs will be displaced	

point  Week 4 Quiz  Ouiz, 10 Questions  Congratulations! You deserve a pat on the back for finishing this course.						
	) Ti	rue				
	) Fa	alse				
_						
		Upgrade to submit
